

Introductory message to the hiring manager.

Hello,

I'm a Staff Frontend Engineer with 10+ years of experience building scalable, high-impact web platforms using React and TypeScript. I've recently been leading frontend architecture and developer experience initiatives, with additional work in OCR- and RAG-based systems for intelligent document workflows. I'd love to connect and explore whether my background could be a good fit for your team.

Linkedin request to connect message.

Hi, I'm a Staff Frontend Engineer with experience in Software Development & architecture. I'm currently exploring opportunities & would appreciate connecting to learn more about your team.
