1. Upload APIs

Start Upload Session POST /upload/session Request: { "fileId": "1234", "size": 2147483648, "contentType": "application/pdf" } Response: { "uploadSessionId": "sess-789", "chunkSize": 67108864, "urls": [{ "part": 1, "url": "https://s3...part1" }] }

Upload Chunks PUT https://s3...part1 (pre-signed URL) Body = raw chunk bytes.

Commit Manifest POST /upload/commit Request: { "uploadSessionId": "sess-789", "chunks": [{ "hash": "abc123", "size": 67108864 }], "metadata": { "author": "alice@acme.com", "compression": "none", "encryption": "AES256" } } Response:

2. Download APIs

Get Manifest GET /files/{fileId}/manifest Response: { "versionId": "v5", "chunks": [{ "hash": "abc123", "size": 67108864, "url": "https://s3...part1" }], "metadata": { "author": "alice@acme.com", "createdAt": "2025-09-05T10:00:00Z" } }

3. Sharing APIs

Update ACL PATCH /files/{fileId}/acl Request: { "add": [{ "principal": "bob@acme.com", "role": "viewer" }], "remove": [{ "principal": "charlie@acme.com" }] } Response:

Create Share Link POST /files/{fileId}/links Request: { "scope": "org-only", "expiry": "2025-09-30T23:59:59Z", "role": "viewer" } Response:

4. Delete & Retention APIs

Delete File DELETE /files/{fileId} Response:

Restore File POST /files/{fileId}/restore Response:

5. Search APIs

Search Files GET /search?q=quarterly+report&filters=type:pdf Response: [{ "fileId": "1234", "title": "Quarterly Report", "snippet": "...", "score": 0.95 }]

6. Conflict Handling APIs

List Versions GET /files/{fileId}/versions Response: [{ "versionId": "v5", "status": "latest" }, { "versionId": "v5a", "status": "conflicted", "owner": "alice@acme.com" }]

Resolve Conflict POST /files/{fileId}/resolve Request: { "keep": "v5", "discard": "v5a" } Response:

7. Resilience / Offline APIs

Batch Sync Queued Ops POST /sync/ops Request: [{ "op": "edit", "fileId": "1234", "baseVersion": "v5", "delta": "...", }, { "op": "delete", "fileId": "5678" }] Response: { "status": "ok", "results": [{ "fileId": "1234", "status": "committed", "versionId": "v6", }, { "fileId": "5678", "status": "tombstoned" }] }

8. Notifications / Events

Realtime Events (WebSocket / SSE) { "event": "fileUpdated", "fileId": "1234", "versionId": "v6" } { "event": "fileDeleted", "fileId": "5678" }

Webhooks { "event": "fileUpdated", "fileId": "1234", "versionId": "v6", "timestamp": "2025-09-05T13:00:00Z" }
